

La Hora de Conectar

Integrated KPI System

Strategic Context

Context

- Category leader for 20+ years with sustained growth
- Coffee shop category growing fast (+7.5% CAGR)
- Growth mainly driven by store openings (+9%)

The problem

- Starbucks Spain growth relies heavily on opening new stores (high cost)
- Transactions per store not increasing
- Signals weakening consumer engagement and rising competition

What must Change

- Shift focus from store openings to store productivity
 - Increase visit frequency
 - Increase penetration (attract more customers per store)

The Campaign: “La hora de Conectar”

Objective:

Drive sales by increasing frequency and penetration

Campaign Idea

- Turn 4–7pm (off-peak hours) into a daily family ritual at Starbucks
- A moment for generations to reconnect after school and work
 - Create a new, repeatable afternoon occasion
 - Drive more visits per store
 - Increase penetration by targeting grandparents (55+) and kids

Target Audience

- Grandparents (55+), Kids
 - Bringing together younger and older Starbucks fans

How it works

- Establish a simple 4–7pm bonding ritual
- Launch “Generations Badge” loyalty challenge
 - Families collect 4–7pm visits
 - Unlock small rewards
 - Build a habit of coming back together

Levers

Lever Statement

The main constraint for growth within the existing stores is few incremental locations and segments with limited growth.

We will unlock growth by owning an intergenerational bonding ritual from 4–7 pm (off-peak) that drives both penetration (+55 yo and >13 yo people) and repeat frequency (create a routine).

Levers

- **Primary lever:** Frequency via a new and repeatable occasion (off-peak)
- **Secondary lever:** Penetration among older (+55 yo) and younger consumers (<13 yo)

The objectives Cascade

1. Business

*Grow same
store transactions*

2. Marketing

*Increase frequency
during off-peak hours (4-7pm ritual);
Increase penetration*

3. Communication

*Ensure the campaign
is seen and accurately understood*

4. Media

*Deliver sufficient coverage
to enable habit formation*

Media Mix

Channel	Audience Segment	What it must deliver	Key tactic & Asset	Metrics
OTV	Baby boomers (+55 yo)	Position “La hora de conectar” among +55 yo people. Create Nostalgia	• Intergenerational scenes; “earn the badge” line	• Reach+1 • Frequency • Gross Rating Points (GRP)
Paid social (Instagram + Tiktok + Snapchat)	Alpha Generation (<13 yo)	Show that the starbucks badges and prices are real and easy to obtain. Boost recall.	• User-generated content-style reels; • “today 4pm to 7pm” reminders; • Badge progress and redemption content	• Reach • Engagement Rate • Cost per click • Conversion rate
Influencers and +55 yo celebrities	Baby boomers (+55 yo) + Generation Alpha (<13 yo)	Normalize the intergenerational ritual + increase trust on the badge program and redemptions	• Influence target audiences by showing how they bond with their grandsons / grandparents. Nostalgic storytelling	• Engagement rate • Cost per engagement • Tracked conversions
Out-of-home advertising	Baby boomers (+55 yo) + Generation Alpha (<13 yo)	Remind on commute/school routes	• Strategic placement near schools, supermarkets, and parks.	• Zone Reach (%)

The KPI Dictionary

KPI	Type	Definition	Formula	Source	Frequency
Reach 1+	Formative	% target exposed $\geq 1x$	Unique exposed $\div$ target universe	Media platforms	Weekly
VCR	Formative	Completed views $\div$ starts	Completions $\div$ starts	Platform analytics	Weekly
Badge Completion	Formative to Summative	Completers $\div$ starters	4 visits $\div$ starters	Loyalty system	Weekly
Off-Peak Lift	Summative	% uplift vs baseline	(Campaign – baseline)/baseline	POS	Weekly
Incremental Tx	Summative	(Exposed – Control)x baseline	DiD model	Analytics	Post
ROMI	Summative	(Incremental profit – cost)/cost	Financial model	Finance	Post

Targets Ex-Ante & Evaluation Ex-Post

KPI	Ex Ante Target	If under target, interpretation	Corrective action (in-flight)
Reach 1+	70%	Insufficient memory-building	Shift spend to broad reach + sequencing
VCR	$\geq 30\%$	Creative not holding attention	Shorter edits; stronger first 2 seconds
Badge Completion	30%	Ritual not sticky / too hard to complete	Add progress nudges; adjust threshold; strengthen rewards
Off-Peak Lift	+3–4%	Ritual not translating to purchases	Improve offer visibility; staff script; customer relationship management timing

Target-Setting Methodology

Targets are derived from:

Historical off-peak growth

Loyalty completion benchmarks
(25-35%)

Media Reach Modeling

Brand lift norms in mature
markets

How We Prove the Campaign Worked

Creating a Comparison Group

*We leave 20% of stores
unexposed to the campaign.*

Comparing Growth

*We compare off-peak growth in
both Exposed and Control
stores*

Isolating the True Effect

*Calculate the Incremental Transactions
(Exposed growth – Control growth) × baseline volume*

Why This Works?

From reporting results to managing performance, this system:

- Turns strategy into clear, measurable actions
- Organizes KPIs in a logical cause-and-effect chain
- Distinguishes between what we optimize weekly and what we evaluate at the end
- Confirms whether the campaign truly caused growth
- Uses data to guide real business decisions

Thank You
